They were averaging about 809 Mcf per day per well during February totaling over 182,000 Mcf during this time frame with an average pricing of \$5.85 per Mcf. In addition to these proceeds, the additional 8 new wells which were paid upon for the month of February, contributing approximately \$260,000, reflecting an average of 230 Mcf per well, per day.

As more regular monthly receipts are made in the months to come, additional information will be made available.

The table below compares this month's production and prices to the previous month's:

	Net to Trust Sales		Average Price	
	Oil (bbls)	Gas (Mcf)	Oil (per bbl)	Gas (per Mcf)
Current Month	64,786	1,037,379	\$94.63	\$5.19

Revenues are only distributed after they are received, verified, and posted. Most energy companies normally issue payment of royalties on or about the 25th of every month, and depending on mail delivery, a varying amount of royalties are not received until after the revenue posting on the last business day of the month. The revenues received after that date will be posted within 30 days of receipt.

Due to the timing of the end of the month of May, approximately \$2,264,000 of revenue received will be posted in the following month of June in addition to normal receipts during June. Since the close of business in May and prior to this press release, \$2,211,000 in revenue has been received.

Sabine Royalty Trust, as it does after the end of each year, had a year-end Reserve Report prepared in accordance with the Securities and Exchange Commission's requirements. This report provides an evaluation of the estimated asset value as of December 31 of each year, which can be used to estimate the remaining life of the Trust.

The estimated net proved reserves, as of January 1, 2022, attributable to the Trust from the properties appraised are approximately 6.0 million barrels of oil and 42.8 billion cubic feet of gas with a future net value of approximately \$470,140,000 with a discounted value at 10% of \$207,703,000. With these estimated quantities of this year's reserve estimate of 6.0 million barrels of oil and 42.8 billion cubic feet of gas remaining, it could be estimated that the Trust still has a life span of 8 to 10 years. The report is an exhibit to the Trust's Annual Report on Form 10-K that was filed on March 25, 2022 and is available to all unitholders at this time on the SEC website and Sabine's website.

The 2021 Annual Report with Form 10-K and the January 1, 2022 Reserve Summary has been posted on the Sabine website at <http://www.sbr-sabine.com/>.
